

Handy Foils

What a Range!!!!

Handy Foils, the only true salon foil specialist in Australia, certainly knows foils. The product range has evolved over the past 17 years to offer the most complete range of specifically manufactured foil for hairdressers.

Foil Rolls

Representing great value-for-money, Handy Foils Rolls are available in 2 widths, 2 lengths and now 3 thicknesses - the thickest and thinnest professional salon foils available, as well as a mid range thickness, all of which are made with a high grade, high strength aluminium. So, whether you prefer the feel of your foil thick, medium or thin, you can't go past the Handy Foils range of salon foil rolls.

Pre-cut & Folded Packs

For the ultimate convenience at a very affordable price, Handy Foils Pre-cut & Folded Sheets are available in 3 lengths, each 12cm in width and with a perfect 1.4 fold providing a strong reinforced edge and allowing easy separation of foils straight from the stylish and functional dispenser box. The new Handy Foils pre-cut

range guarantees to be both the cheapest and best quality pre-cuts available to Australian hairdressers. Their use is ideal for the smallest salons right through to the largest salons, allowing owners to eliminate a labour-intensive backroom function from the salon and better focus staff on servicing clients.

Coloured Foil

Handy Foils offer a dazzling range of foil in 7 colours. With a choice of silver, gold, red, blue, pink, purple and blue-check, there is sure to be the perfect colour to compliment the décor or ambience of any salon. Add an extra degree of professionalism to the colouring process by using different coloured foils for multi-dimensional highlighting, allowing effective removal of foils as particular

tones develop and ensuring a well-organised job tailored specifically to each individual client.

To get more information on any Handy Foils products or to find your nearest stockist, visit www.handyfoils.com.au or call 1800 643 534. Ask for your free sample and compare to your existing foil.
